

Flavonoid-Rich, Innovative DGL for Digestive Health

GutGard® is a clinically researched, flavonoid-rich, natural bioactive for digestive health derived from *Glycyrrhiza glabra*. This low dose innovative DGL is flexible enough for a variety of formulation needs. GutGard® is neutral in taste and can be combined with probiotics and digestive enzymes.

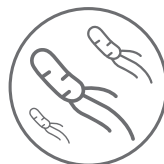

Why GutGard® is an Innovative DGL?

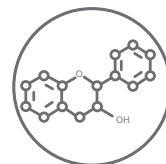

Soft extraction process to retain high flavonoid content

Clinically studied for alleviating symptoms of occasional indigestion & occasional heartburn

Clinically studied to support management of *Helicobacter pylori*

High flavonoids (>10% w/w) by HPLC and >50 different flavonoids identified by LC-MS

< 0.5% glycyrrhizin ensures better safety

Can be combined with probiotics and digestive enzymes

Low dose allows for flexibility in formulations

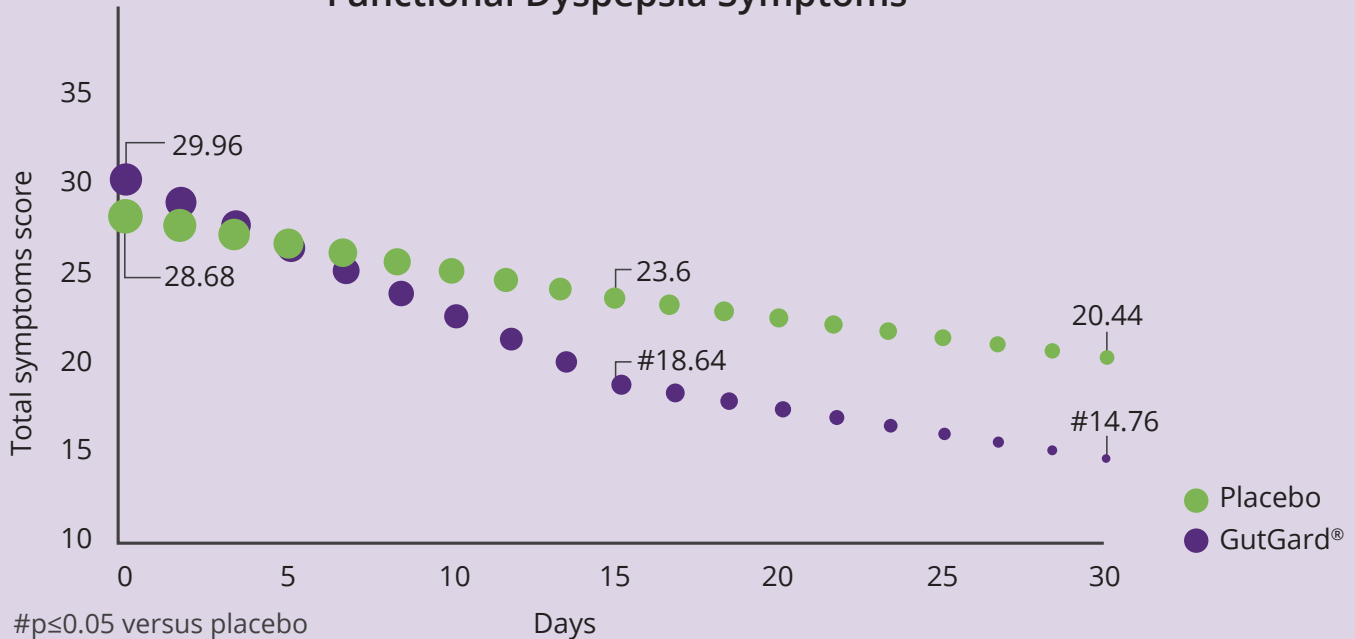

Neutral taste makes it suitable for a wide range of delivery applications like chews, gummies, beverages, and powders

Clinical Study of GutGard® for Occasional Indigestion and Occasional Heartburn

Functional Dyspepsia Symptoms

GutGard® effectively managed the symptoms of occasional indigestion and occasional heartburn

Innovative in its Applications

- **Combination with Probiotics:** Low water activity of GutGard® (less than 0.2) makes it suitable for combining with probiotics
- **Combination with Digestive Enzymes:** GutGard® can also be combined with digestive enzymes as it does not inhibit their activity

GutGard®: Recommended Dose & Uses

Dose : 150 mg per day
